

# MAXATP™

## RIBOCEINE FUEL

### Ingredients (continued)

**B Vitamins** (thiamine, riboflavin, niacin, pantothenic acid, pyridoxine, biotin, folic acid, cyanocobalamin)-support various enzymes that help convert food to energy. B vitamins serve as coenzymes that assist in specific metabolic processes to break down fats, amino acids, and carbohydrates for energy.

**Magnesium**- essential in all energy dependent reactions that include the use of ATP energy. It serves as a catalyst in the creation of ATP from ADP. It is also a catalyst when ATP is used for energy by helping in the hydrolysis of ATP (the act of releasing the energy stored in the high energy phosphate bond).

**Copper** - plays an important role supporting the synthesis of ATP in the mitochondria, or the part of the cell responsible for energy production.

**Chromium** - an essential trace element that is needed for the metabolism of energy.

### Suggested Use

As a dietary supplement, mix one packet with 4-6 oz (120-180 mL) of water.  
Store product in a cool, dry place.

### FAQs

#### What is ATP?

ATP, or adenosine triphosphate, is your body's most basic form of energy. ATP is produced in every cell and is the means by which our cells, organs, and by extension, our bodies are powered. ATP needs many different compounds or elements to be produced. MaxATP™ was designed with your body's energy needs in mind and provides a comprehensive list of elements needed for ATP production.

#### How is MaxATP different from energy drinks?

Most energy drinks focus on short-term energy boosts by delivering high dosages of sugar, caffeine and other stimulants. MaxATP aims to assist cell health and metabolism maintenance.

#### Can I take MaxATP with MaxGXL™, Cellgevity™ and MaxN-Fuze™?

MaxATP is designed to work synergistically with all of our Max products and can be taken together.
